VEGGIE BURGER

NOVELTY! - 100% VEGAN BURGER!

Imagine plant based burger patties, with the same texture, appearance and taste as traditional patties...this is now a reality.

Solina has been working intensely and corporately, on creating burger patties, based on vegetable protein, gently supported by selected vegetable fibers. The result is burger patties, with a juicy texture and excellent biting properties.

The importance of the visual impression of a plant based burger patties, cannot be underestimated, as this is the first impression of the product. As such a significant effort has been put into creating the perfect visual impression of burger patties, providing a juicy red center and a grilled brownish outside. This appearance can, as an extra benefit, be adjusted to match any desired specifications.

The taste of the patties is quite neutral with a slight savory taste and can be customized with chargill, smokey or a completely new taste direction.

We are quite excited about these new burger patties and are looking forward to let you taste, see and sense our newest creation.

Veggie

100% VEGAN

VEGETARIAN BRINE

PU no. EX00381

Natural flaveurings, salt, beetroot extract, dextrose.

FUNCTIONAL BINDER

PU no. EW00185

Gelling agent: Méthylellulose (E461), vegetable fiber, onion fried, spice.
